

ABBYY FineReader PDF Mobile for Enterprise

Equip your employees with a mobile scanner outside of the office

What is ABBYY FineReader PDF Mobile for Enterprise?

It is the version of our powerful mobile scanner—FineReader PDF for iOS and Android—specifically designed for businesses. It supports popular mobile device management (MDM) or enterprise mobility management (EMM) systems, and provides the ability to enable or disable features based on an organization's needs and security policy.

FineReader PDF for iOS and Android turns your mobile device into an all-purpose tool to quickly capture documents and books, create electronic copies in PDF and JPEG, and extract text from scans and convert it to PDF, Word, Excel, PPT, TXT, FB2, EPUB, and more.

Save time with digital workflows

Scan internal and client documents using a smartphone and create professional-looking images.

Enable remote work

Facilitate access to and retrieval of information and documents with direct transfer to corporate cloud storage.

Ensure secure data transfer

Confidential information of customers and partners is reliably protected using modern technologies.

Key features

More convenient than a desktop scanner

Scan any printed or hand-written papers, create perfect digital copies, and save them as JPEG or PDF documents.

Extract text from scans

Grab text from scans offline or use online recognition to preserve the original document formatting. Supports 193 languages and 12 document conversion formats.

Export anywhere

Share the scans with your colleagues and partners on the go: email, print, or save to cloud storage, including Google Drive, Dropbox, Evernote, iCloud Drive, and more.

Classify and search with AI

The neural network analyzes the smartphone gallery and splits photos into seven categories: A4/US letter, books, business cards, handwritten, IDs, receipts, and other docs. You can instantly search through the text on the photos. Images are securely processed offline on the device.

Annotate scans

Use our set of easy-to-use tools to modify your PDFs: add your signature or a text box, use the highlighter, write with a pen, or conceal sensitive content with the redaction tool (iOS only).

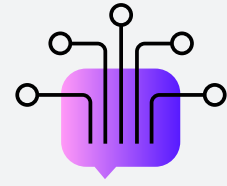

Interface Languages

iOS

- Chinese Simplified, Chinese Traditional, English, French, German, Japanese, Italian, Korean, Portuguese, Russian, Spanish
